Our recent description of *Echinotermes biriba* (Castro et al. 2018) does not clearly define the type repositories as we only give the acronyms “CATAC” and “UF”. The holotype and paratype workers are deposited in the Colección de artrópodos terrestres de la Amazonía Colombiana of the SINCHI Institute in Leticia, Amazonas, Colombia (CATAC). Additional paratype workers are deposited in the University of Florida Termite Collection at Fort Lauderdale Research and Education Center, Davie, Florida, United States (UF).
